## February '07 Construction Update “We Are Growing Now”

As you can see the first floor of the new Science and Technology Building was completed and opened its doors on the first day of the Spring '07 semester. Disciplines on the first floor include Computer and Information Science and Graphic Design along with a 100+ computer lab for students. The second floor construction will be completed by the end of February. Relocation into the second floor will take place in two phases. Phase 1 (Physics and Earth Science) will take place over Spring Break. Phase 2 (Chemistry, Biology, Anatomy, Physiology, and Microbiology) will take place at the end of the spring semester.

Both our Student Center and Communication Arts Building are well underway with construction completion of the Student Center scheduled for August '07 and Communication Arts for October '07.

In addition to the new buildings under construction, several other projects are in the planning stages to begin work in 2007 and 2008. Projects include: emergency power to campus lighting, new campus signage, classroom remodels in building A – G, fire barrier behind buildings, irrigation upgrades, construction of new Bus/CIS building, and more.

Please click the below link to view the college's construction homepage. Once on the construction homepage click on the 'Current Updates' link on the left side of the page to view the latest detailed construction updates along with pictures of the current and future projects.
