Cuyamaca College Ornamental Horticulture Program Internship Program

Thank you for your interest in the Cuyamaca College Ornamental Horticulture Internship Program. The department established its first internship program in 1995 with a generous donation from the Rice Family Foundation. Since that time other individuals and organizations have joined the program to provide paid internships for students to work at the Cuyamaca College Ornamental Horticulture field site. These internships help to increase skills in horticultural practices and gain experience in positions of leadership with responsibilities and expectations that help prepare you for careers in the horticulture industry.

The internship program provides experience in a wide variety of areas of our program, some of which are listed on the following page. Interns must be currently enrolled in the Cuyamaca College Ornamental Horticulture Program with satisfactory grades. Positions are part-time and may extend for several months to a year. Many positions begin in June, but other opportunities open during the school year. If you have further questions about the program, or would like to apply for an internship, contact John Thomas, the Ornamental Horticulture Technician.

Contact Information: 619-660-4262 email: john.thomas@gcccd.edu

Sincerely,

Bradford R. Monroe
Program Coordinator
Ornamental Horticulture
