

STUDENT COMPUTER NETWORK ACCOUNT

Once you have registered and paid your student fees, it takes 24-48 hours for you to have your own student computer network account, to access the network resources on campus only.

What you will get is:

- **20 MB's of space to save your documents on the campus network.**

Logging into the network requires your Web Advisor user name and your 6 digit date of birth

User name: [john.smith2357](#)

Password: [051091](#)

The default location of this space is: "User Name\$ on 'coyote2' (H:)." For example, using the User Name of " john.smith ," the default location of this space would be: john.smith\$ on 'coyote2' (H:).

Students can save their documents on this space. They can retrieve their saved files at *any* networked computer at Cuyamaca College. **Once the semester is over, this network account will be deleted and all the files on it will be erased.**

While more than 200 word processing documents of normal file size can be saved on 20 MBs of space, just a few graphic, music files or multimedia files can quickly consume 20 MB of disk space.

Students, who need copies of their documents they saved on the College Network, should copy their files to a removable drive (USB flash drive or memory stick) and or send via e-mail before the current semester is over (We do not have CD burners).

- **An e-mail account with your own personal student e-mail address.**
